

FACULTY OF
ECONOMIC SCIENCES

Graduate Programs 2025

Economics & Economic Policy (taught in English)

The purpose of this programme is to prepare students for the future work in academia, government agencies, private companies, and centers for economic analysis. Graduates of the applied economics track are trained to analyze and forecast consequences of decisions in business and public policy. Research track provides thorough knowledge of economic theory and methods to carry out advanced theoretical and empirical research and prepares students for the future academic career.

Strategic Corporate Finance (taught in English)

This programme is designed for those who want to gain a deep understanding of finance and its many applications. While the focus is on corporate finance, the programme has a balanced curriculum covering macroeconomics, microeconomics, econometrics, quantitative finance, behavioural finance, and many more. Graduates of the programme work at leading consulting groups, investment banks, M&A advisory firms, and investment funds in Moscow, London and other global financial centers. Some pursue careers as strategy consultants, buy-side analysts, and portfolio managers, while others develop their own businesses, conduct academic research, and work as CFOs in real sector companies.

ALUMNI FEEDBACK

Strategic Corporate Finance

My time at HSE University was transformative and enlightening. The academic environment not only enriched my understanding of finance, but also provided avenues for hands-on learning experiences that were fundamental in bridging the gap between theory and real-world applications. I appreciate the structure of the programme with a blend of economics and finance subjects. My personal experience at HSE has been instrumental in shaping me into a well-rounded finance academic. The knowledge in research and the practical skills gained during my studies have equipped me for success both academically and professionally, and I am eager to contribute meaningfully to the field of finance!

Master in Business Analysis (online, in English)

Students are offered cutting-edge concepts and methods of business analytics and strategic reporting driven by the principles of regenerative finance, inclusive capitalism, and enhanced value creation for financial and non-financial stakeholders. The programme's areas of focus correspond with the new competencies that transnational employers seek in the knowledge economy and the sustainable development of countries and companies in uncertain times. The curriculum covers the following topics within a global scope: new trends in value creation analysis involving non-financial capitals of a company, their disclosure, as well as auditing and assurance strategies.

Programs taught in Russian with some courses in English

- Stochastic Modeling in Economics and Finance
- Statistical Analysis in Economics
- Financial Markets and Institutions
- Corporate Finance
- Financial Engineering
- Economic Analysis (Online)
- Investments in Financial Markets (Online)

Experiential Learning

Internships, research projects and groups, as well as international experience are all integral parts of our academic process. Exchanges and summer programs allow students to further gain international exposure. We facilitate a unique collaborative environment where students with diverse academic backgrounds, researchers, faculty and employers exchange knowledge and skills. Project based learning enables students to fully immerse themselves in their field of study and gain work experience before they graduate, benefitting their future careers.

HOW TO APPLY?
